EPO-RTTM 30 Resin

EPO-RTTM series are wet layup and resin transfer moulding epoxy systems that are designed for structural production applications. Several hardeners are available for use with EPO-RTTM series. These systems give excellent wet-out of fiberglass, carbon and aramid fibres. EPO-RTTM series will cure completely at room temperature, or can be given an elevated temperature cure. The best ratio on EPO-RTTM 30 is 100:60 by weight and has an about 30-minute pot life.
